our whole Meta ads strategy fits on one

SHEET

and the ads are actually the last step...

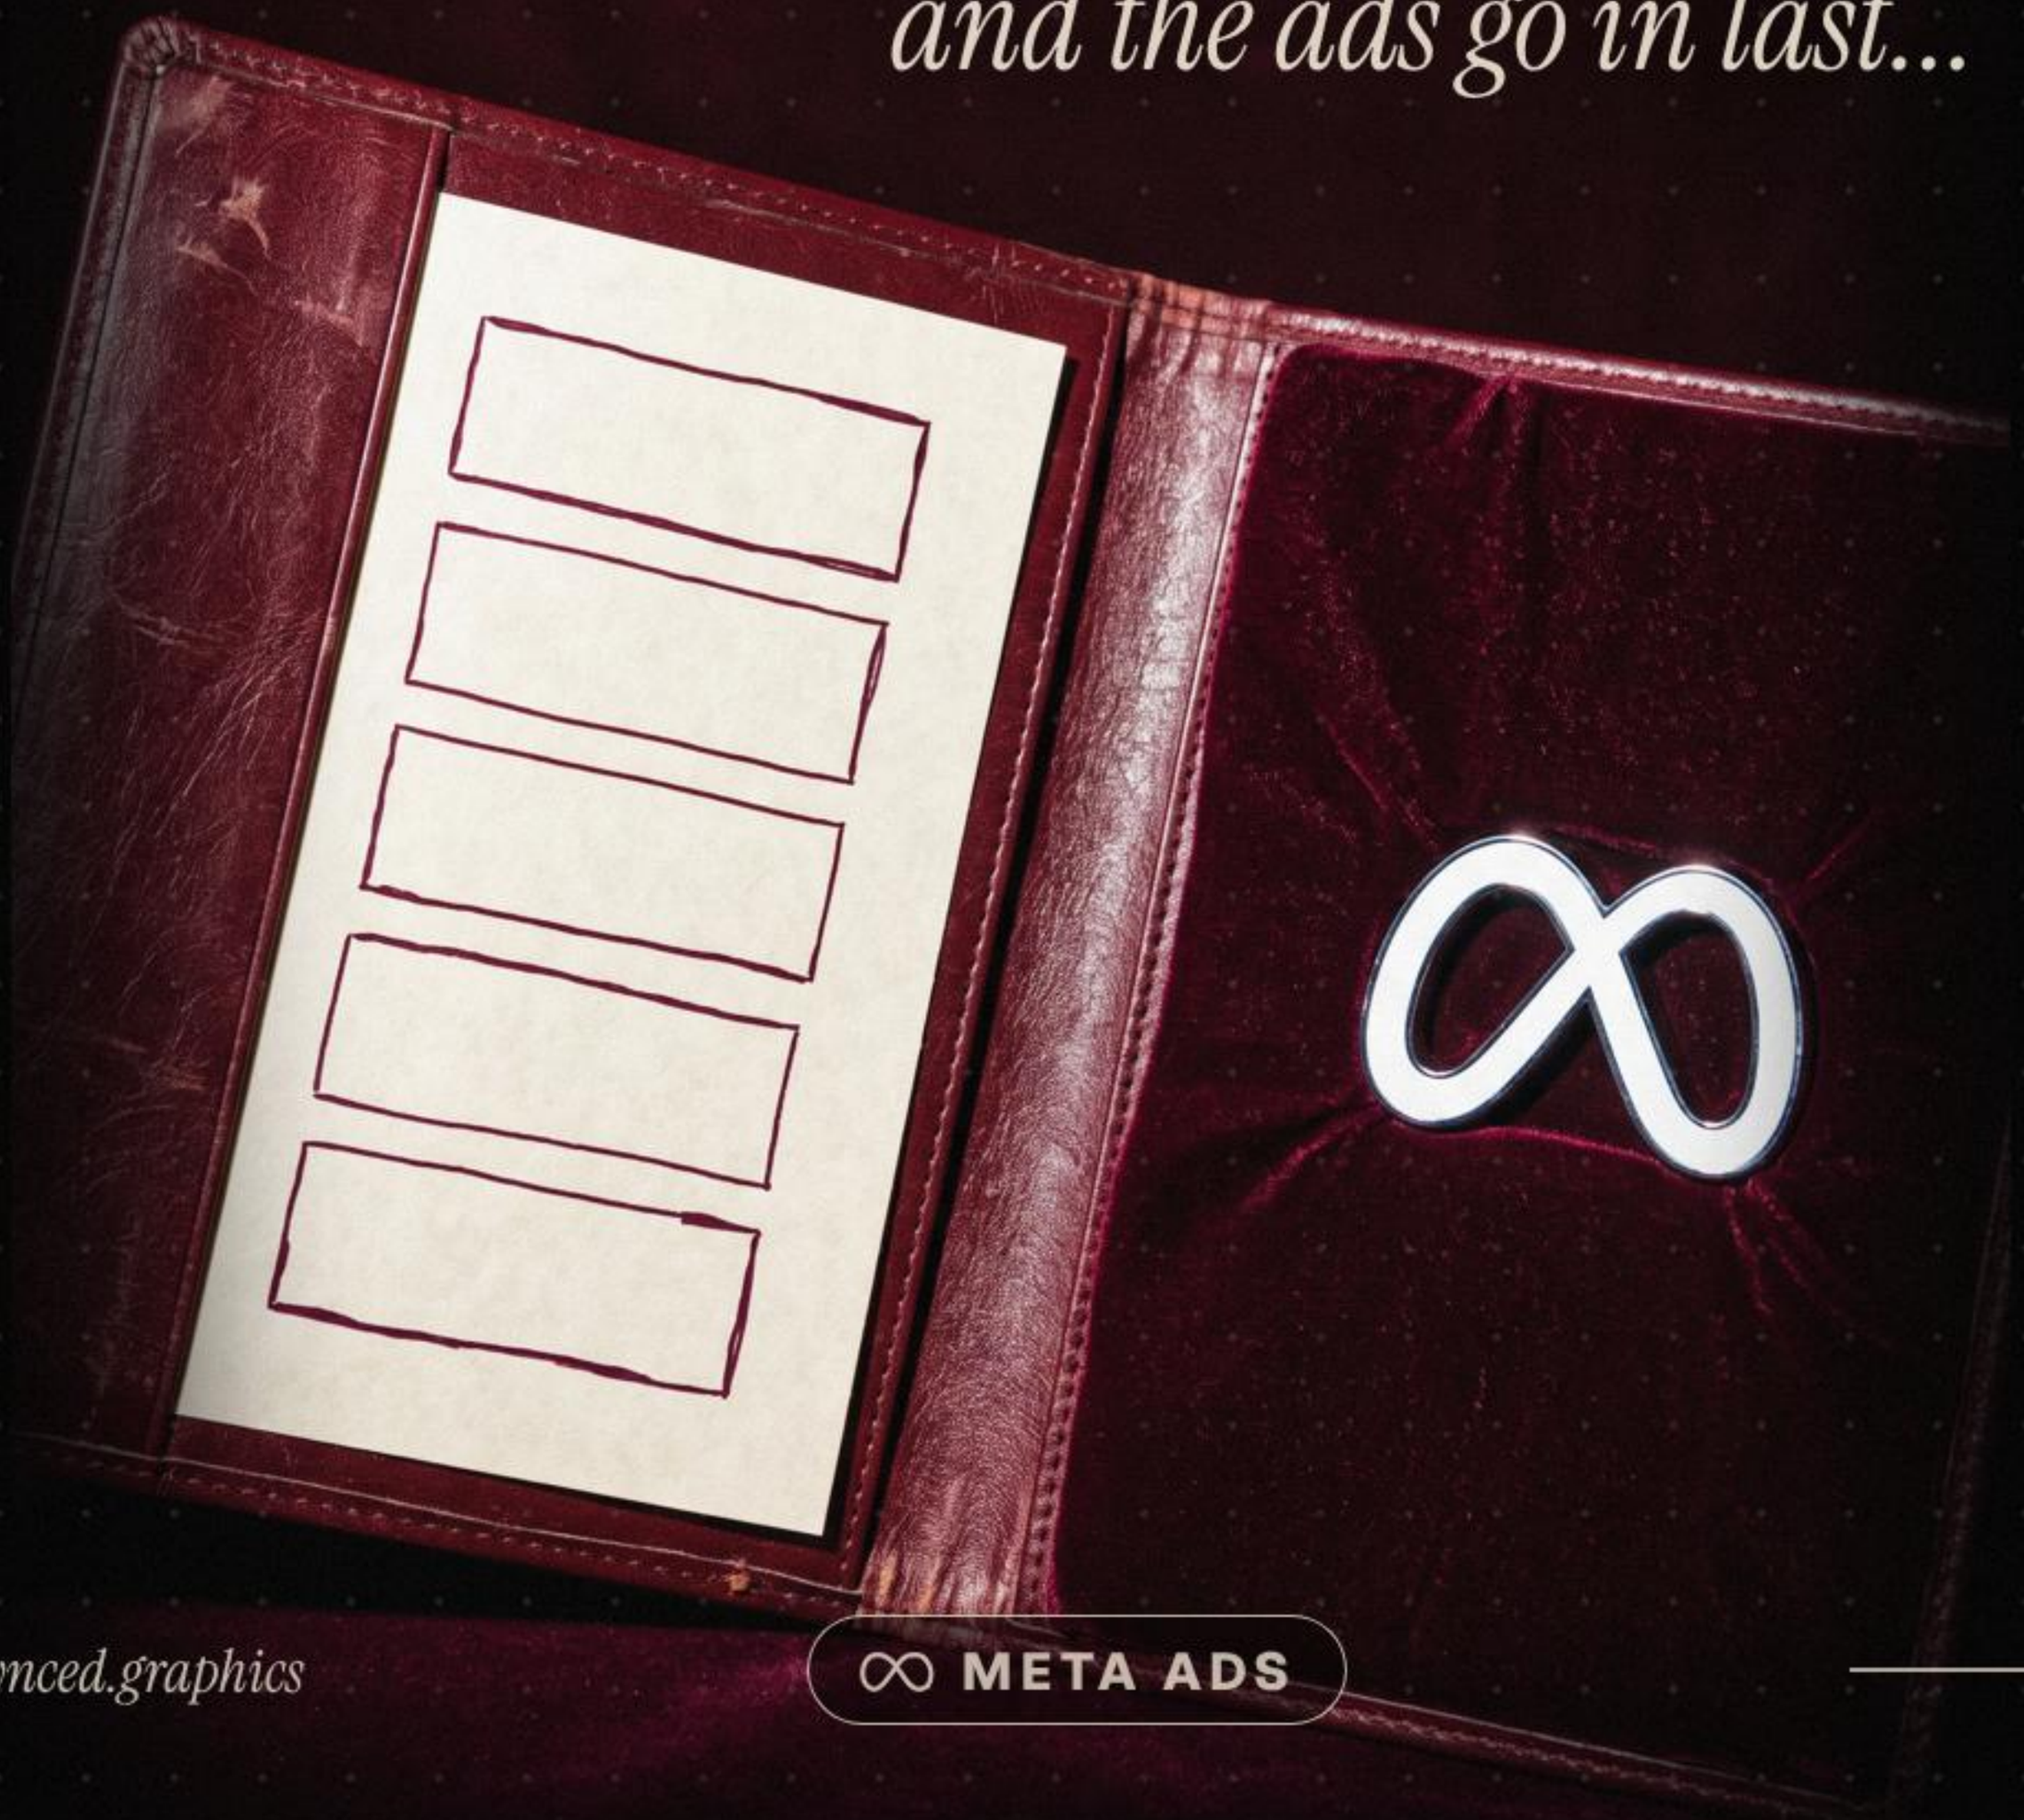

synced.graphics

META ADS

five boxes, filled in

ORDER

and the ads go in last...

synced.graphics

META ADS

BOX 01 · YOUR LINE

THE MOST A CUSTOMER CAN *cost*

$15

EXAMPLE $40 PRODUCT

everything below gets judged against this...

example numbers

BOX 02 · HERO OFFER

ONE OFFER EVERYTHING *pushes*

a bundle, a useful gift, or a guarantee people can see. four offers at once confuse people and split your data...

– two for $65 leaves **$27**

example numbers

BOX 03 · THE PAGE

FIRST SCREEN = THE AD'S *promise*

offer first, the guarantee by the buy button, one shipping rule. plus one offer on the thank-you page...

BOX 04 · ADS

THREE ANGLES, *two campaigns*

01 test: 3 to 5 new ads a week

02 angles: problem, proof, offer

03 scale: winners only, most of the budget

BOX 05 · MONDAY

20 MINUTES, *every week*

01 move winners below the line to scaling

02 cut losers, add 3 new angles

03 below the line? raise the budget 20%

why it works...

BOXES 1 TO 3 ARE WHY BOX 4 *works*

the same order took a golf ball brand from break-even at 2.5x ROAS to 5x, and even 11x...

fill in box 1

TODAY

then box 2. the ads come last...
