3 simple Meta moves that

STRETCH

a small budget into real returns, right now...

synced.graphics

META ADS

Meta wants

FIFTY

sales a week. $20 a day gets you about 8...

synced.graphics

MOVE 01 / 03

ONE CAMPAIGN, *one ad set*

split $20 ten ways and nothing ever learns. keep every sale in one place...

01 broad audience, optimize for purchases

02 leave it alone for a week

MOVE 02 / 03

THREE VERY *different* ADS

Meta reads the ad to decide who sees it. three colors of one image reach one audience...

01 the problem, in your customers' words

02 proof

03 the offer

MOVE 03 / 03

AN OFFER THAT LEAVES *more*

–	1 jar at $40, you keep	**$15**
–	2 jars for $65, you keep	**$27**

more room per order, same ads, same $20...

example numbers

the one number to watch...

$15

THE MOST A CUSTOMER CAN COST YOU

below it, raise the budget slowly. above it for two weeks? the offer is the problem, not the ads...

example numbers

synced.graphics

META ADS

on $20 a day,
patience is part of the
SETUP
every edit restarts learning. change one thing a week, never five...
