Meta changed 4 times this year, one number

NEVER

did. Start your 2027 plan there...

META ADS

CHANGE 01 / 04

YOUR AD IS THE *targeting* NOW

Meta reads the ad itself to pick who sees it. ten versions of one photo look like one ad...

→ make one ad per reason to buy

CHANGE 02 / 04

AI BUILDS THE ADS *faster*

Meta's AI tools now write and build ads. they speed up whatever plan you already had...

they can't tell if a sale made money unless you give them your costs.

CHANGE 03 / 04

SAME SALE, *two counts*

- standard: every sale, even people who'd buy anyway
- incremental: only sales the ad caused

the return looks lower, and it's closer to the truth...

CHANGE 04 / 04

ADS INSIDE *ChatGPT*

people already ask ChatGPT what to buy. early results are mixed and the tools are basic...

→ test a budget you'd be fine losing

[VERIFY current status before posting]

the one that didn't change...

$15

WHAT A $40 ORDER LEAVES YOU

break-even ROAS about 2.7. every change above is a new way to pay for a customer...

example numbers

new tools come and

go. work out your

BREAK-EVEN

first, then the offer, then the ads...

want a Meta plan built on

YOUR

numbers?
